

Ghost Golf: what we found, and how we would help

Prepared for your Social Media, UGC & Affiliate Coordinator opening · September 17, 2026 · Public checks of ghostgolf.com

IN ONE PARAGRAPH

Ghost Golf's store is well built and well indexed, with Tag Manager, a Google Ads tag and a TikTok Pixel already in place. The gap is the link between the store and the programmes this role runs. The site links to Instagram and Facebook but not to a TikTok profile, even though TikTok Shop and creators are a growth focus. Creators and affiliates check a brand's TikTok before they agree to work with it.

WHAT IS ALREADY WORKING

- The Shopify store loads over HTTPS in about 1.2 seconds on our check.
- Google Tag Manager, a Google Ads tag and a TikTok Pixel are installed, and email signup is live.
- Product, collection and apparel pages appear throughout a public search of your domain.
- A sitemap is referenced in robots.txt, including a Canadian store version.
- The footer is current for 2026, and Instagram and Facebook are linked.

FINDINGS BY RISK

TikTok link	Medium	The site does not link to a TikTok profile, although a TikTok Pixel is installed. Creators and affiliates vet a brand on TikTok before saying yes, and shoppers cannot follow the channel you are investing in.
Meta tracking	Medium	A Meta Pixel is not visible in the page code. Shopify can load it through customer events, which do not show from outside. Creator and affiliate content often gets boosted on Instagram. Confirmed purchase events are what show which creator actually sold. Worth a check in your Shopify admin.
Structured data	Medium	We found no structured data on the homepage. Organisation and brand markup helps search engines show your brand details correctly.
Homepage heading	Low	The only H1 on the homepage is "GHOSTGOLF". Premium golf bags and magnetic towels are what people search for, and they sit in the title tag but not the main heading.
Image alt text	Low	9 of the 38 homepage images have no alt text. A quick fix for accessibility and image search.

WHAT WE WOULD DO FIRST

- Keep Instagram, Facebook and TikTok inboxes answered in the GHOSTGOLF voice, escalating what needs the team.
- Research and shortlist UGC creators and affiliates who fit golf and lifestyle, not just follower count.
- Run outreach, onboarding, briefs, codes and product orders, and chase content to delivery.
- Keep Notion trackers current, so no creator deadline slips without a flag.
- Send a weekly report on deliverables, affiliate activity and content performance.

A USEFUL WAY TO START

If you bring us on for this role, the first week includes a shortlist of vetted golf and lifestyle creators with a note on why each fits, at no extra cost.

WHO WE ARE

Balay ni Bruno & Co. is a small operational support studio. You hire one person and get a team behind them: websites, email, social content, CRM automation and reporting that all speak with one voice.

- We run a creator outreach programme for a haircare brand: finding and vetting creators, outreach, briefing and chasing content to delivery.
- RJ previously did creator outreach for Houston Kold Reels and led influencer work for Crown Limited Supply, an e-commerce merch brand.
- We build and run Shopify stores, including srivierhair.com.

HOW WE CHECKED

Checked from the outside on September 17, 2026: homepage code and headings, tracking tags, robots.txt and sitemap, structured data, image alt text, linked social profiles, a public site search of your domain. We did not log in to anything and we have no access to your analytics or ad accounts, so anything below marked not checked is exactly that.

- Your TikTok Shop, Aspire and affiliate programme data.
- Your Shopify admin, customer events and ad accounts.
- Page speed scores, because Google's PageSpeed service did not respond during our check.
