

Lashes by Portia: what we found, and how we would help

Prepared for your Creative Content Editor opening · September 17, 2026 · Public checks of lashesbyportia.com

IN ONE PARAGRAPH

Lashes by Portia has something most studios never build: an online Korean Lash Lift training course and a product line, selling from a fast Shopify store. The gaps are about connecting that store to the Instagram you are growing. The site does not link to your Instagram, there is no search description, and only a handful of pages show up in search. The content you are hiring for will work harder once those paths are in place.

WHAT IS ALREADY WORKING

- The Shopify store loads over HTTPS in about half a second on our check.
- Online Korean Lash Lift training and the PKC lash moisturiser are live and appear in search.
- Structured data is present and the sitemap is referenced in robots.txt.
- The About page explains your Korean lash lift training clearly.

FINDINGS BY RISK

Instagram link	High	The site does not link to your Instagram or TikTok. Instagram is where your audience finds you. Someone who lands on the store from a course link or a search cannot follow the page you are growing.
Search description	Medium	The homepage has no meta description. Search engines write their own text under your name. A short line about Korean lash lifts in Melbourne and online training says it better.
Search visibility	Medium	A public search of your domain shows only the About page, two products and the collections page. Studio services and training are what people search for. Pages for those give search something to show.
Tracking	Medium	GA4 and the Meta Pixel are not visible in the page code. Shopify can load them through customer events, which do not show from outside. Without them you cannot see which Reels send people to buy the training. Worth a check in your Shopify admin.
Image alt text	Low	3 of the 7 homepage images have no alt text. A quick fix for accessibility and image search.

WHAT WE WOULD DO FIRST

- Edit Reels, trial Reels and TikToks from your footage, soft and feminine, on brand every time.
- Design carousels that teach one lash lift idea at a time, built to be saved and shared.
- Research what is working on lash and lash lift pages each week and bring you ideas.
- Plan content around what you sell: your online training and your products.
- Suggest the small store fixes, like the Instagram link, so your content has somewhere to send people.

A USEFUL WAY TO START

If you bring us on for this role, the paid trial includes a one page content plan for your first month, built around your training course and products, at no extra cost.

WHO WE ARE

Balay ni Bruno & Co. is a small operational support studio. You hire one person and get a team behind them: websites, email, social content, CRM automation and reporting that all speak with one voice.

- We run social content, including weekly Reels, for Freccia Construction, a custom builder in Austin, Texas.
- We run a creator outreach programme for a haircare brand, so beauty content is familiar ground.
- We build and run Shopify stores, including srivierhair.com.

HOW WE CHECKED

Checked from the outside on September 17, 2026: homepage code and headings, tracking tags, robots.txt and sitemap, structured data, image alt text, linked social profiles, a public site search of your domain. We did not log in to anything and we have no access to your analytics or ad accounts, so anything below marked not checked is exactly that.

- Your Instagram and TikTok accounts and insights.
- Your Shopify admin and booking system.
- Page speed scores, because Google's PageSpeed service did not respond during our check.
