

Lush Lobster: what we found, and how we would help

Prepared for your Social Media & Influencer Marketing Specialist opening · September 16, 2026 · Public checks of lushlobster.com

IN ONE PARAGRAPH

The store is well built: fast, indexed, nearly every image labeled, and Tag Manager, the Google Ads tag and the Meta Pixel all installed. The gap is the bridge to the channel you are hiring for. The homepage does not link to an Instagram or TikTok profile, and a creator deciding whether to work with you checks exactly that. We also could not see a TikTok Pixel, which TikTok uses to learn who buys.

WHAT IS ALREADY WORKING

- The Shopify store loads over HTTPS in about 1.2 seconds on our check.
- Google Tag Manager, a Google Ads tag and the Meta Pixel are installed.
- Email signup and live chat are live, and structured data is present.
- The title "Personalised Greeting Cards Shipped Same Day" states your strongest offer clearly.
- 155 of the 159 homepage images have alt text, and a public site search shows good indexing.

FINDINGS BY RISK

Social links	High	The homepage does not link to an Instagram or TikTok profile. Creators vet a brand by its social before they agree to a collaboration, and shoppers who land on the site cannot follow the channel you are investing in.
TikTok tracking	Medium	A TikTok Pixel is not visible in the page code. If it is connected through a Shopify app, it will not show from outside. TikTok ads and creator campaigns optimize on pixel events. Worth confirming in your Shopify admin before creator spend scales.
Homepage heading	Low	The only H1 on the homepage is "Lush Lobster". Your same day personalised card offer lives in the title tag but not the main heading. Adding it helps search engines and first time visitors.
Image alt text	Low	4 of the 159 homepage images have no alt text. Nearly done. A five minute fix.

WHAT WE WOULD DO FIRST

- Add Instagram and TikTok links across the site so creators and shoppers can find the channels.
- Write clear UGC guidelines and a one page creator brief built around the same day, last minute buyer.
- Build a vetted creator shortlist that checks audience fit, not just follower count.
- Confirm TikTok Pixel events before creator campaigns scale.
- Send a weekly report on what each creator campaign produced.

A USEFUL WAY TO START

If you bring us on for this role, the first week includes a shortlist of vetted creators and a ready to send creator brief, at no extra cost.

WHO WE ARE

Balay ni Bruno & Co. is a small operational support studio. You hire one person and get a team behind them: websites, email, social content, CRM automation and reporting that all speak with one voice.

- We run a creator outreach programme for a haircare brand: finding and vetting creators, outreach, briefing and chasing content to delivery.
- RJ previously did creator outreach for Houston Kold Reels and ran LinkedIn lead generation at OMNI.
- We run Instagram and TikTok content, including short form editing, for several brands.

HOW WE CHECKED

Checked from the outside on September 16, 2026: homepage code and headings, tracking tags, robots.txt and sitemap, structured data, image alt text, linked social profiles, a public site search of your domain. We did not log in to anything and we have no access to your analytics or ad accounts, so anything below marked not checked is exactly that.

- Your TikTok Shop account, affiliate programme and ad accounts.
- Your Shopify admin, apps and customer events.
- Social follower and engagement numbers, and page speed scores, because Google's PageSpeed service did not respond during our check.
