

The Daily Carousel Workflow

From a trending news item to a finished carousel and captions — in one conversation with our AI Family.

WHAT THIS WORKFLOW DOES

Every day, our AI Family scans for trending news relevant to small business owners. We pick the one angle that fits our audience. One command later, a finished carousel with slides AND platform captions sits in a folder ready to post. No scrambling. No design back-and-forth. No caption-writing session.

THE 3 STEPS

- | | | |
|-----------|----------------------|--|
| 01 | Trend lands | Our trending detector surfaces 3-5 relevant news items for small business owners. Each comes with a confidence score and a BBC-specific angle. RJ picks one. |
| 02 | One command | "Create a carousel for this. Add a bonus slide. Include the captions." That's the entire brief. The AI Family — Raphy, Sonny, and Vidz — takes it from there. |
| 03 | Ready to post | A folder appears in the content queue: carousel slides (PNG) + captions for Instagram, LinkedIn, TikTok, and Facebook. One click in Postiz and it's live across platforms. |
-

THE AI FAMILY BEHIND IT

- | | |
|--------------|--|
| Raphy | Designs the carousel — hero slide, 4-5 teaching slides, bonus slide, CTA slide. All on-brand, all in one go. |
| Sonny | Writes platform-native captions for Instagram, LinkedIn, TikTok, and Facebook. Follows BBC's universal caption rules — no jargon, real language. |
| Vidz | Handles motion when the workflow produces a video variant (the 63-second explainer reel uses this workflow as its subject). |
-

THE EXACT COMMAND WE USE

"Create a carousel for [topic]. Add a bonus slide. Include the captions."

That one sentence kicks off Raphy, Sonny, and Vidz working in parallel. The output lands in CONTENT_QUEUE/ with everything named, organized, and ready.

Want this running in your business?

The Daily Carousel Workflow is part of every BBC partnership at the Authority tier. We set it up, train it on your brand, and hand it over running.
