

A note for Raul Davila Jr

Prepared for Raul Davila Jr, Seguin Realty, Seguin · September 11, 2026

WHO WE ARE

We are a small operational support studio. Real estate is not new to us, we built the website, content, and AI systems behind Real Cavalry, a San Antonio brokerage, ran a two-year marketing partnership with a Texas real estate investment firm, and built the email and CRM systems behind a real estate closing company. That is the same work we would bring here: the content, the follow-up, and the systems that keep a pipeline warm between closings.

WHAT WE NOTICED ABOUT RAUL DAVILA JR

You are already doing real things well:

- You run your own brokerage rather than working under someone else's sign, which means decisions about marketing are actually yours to make.
- The range is wider than most: short sales, foreclosures, first-time buyers, farm and ranch and horse properties, and you work in both English and Spanish. In Guadalupe County that combination is worth a lot more than it looks on paper.

Where we see the fastest room to grow:

- The site is four pages: Property Search, My Listings, About Me and Contact Me. There is nothing on it that would ever turn up in a search for anything except your own name.
- There is no email capture and nothing that would bring anyone back. Every visitor is a one-time visit, and for an owner-operator that is the most expensive gap on this list.

WHAT WE WOULD DO FIRST

Give the site something to be found for. A handful of real pages on the Seguin and Guadalupe County market, in both English and Spanish since you already work that way, plus a simple capture underneath them. That is the smallest change that turns the site from a business card into something that brings you people.

THE SIMPLEST NEXT STEP

A short call, no pitch deck required, just to see if this is a fit. You can also see exactly how we work, and the real estate systems we have already built, at balaynibruno.co/real-estate-agent-marketing.html.
